

# All Dogs Are Individuals

**Eighty-four percent** of Americans believe citizens should be allowed to have any breed of dog they choose\*, and we agree!

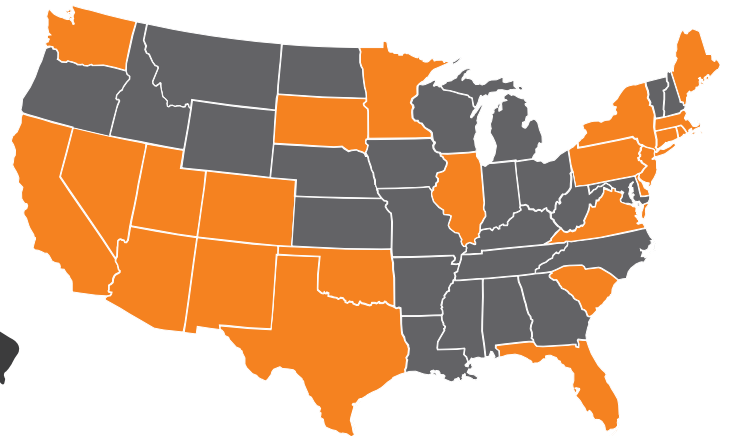

**Why?** Because legislation targeting dogs by breed — instead of careless owners — has proved ineffective. Not only do such laws infringe on basic rights, they fail to enhance public safety for people and pets.

As of 2019, **22 states** have provisions against breed-discriminatory legislation, and we're working to increase that number.

Simply put, we want to ensure that pet lovers can make any dog they love a part of their family, no matter the dog's breed.
